The accompanying notes are an integral part of these condensed interim financial statements.

## **1. NATURE AND CONTINUANCE OF OPERATIONS**

Nano One Materials Corp. (the “Company”) was incorporated under the laws of the Province of Alberta on November 5, 1987 and continued under the laws of the Province of British Columbia on September 8, 2004. The Company’s head office address is Unit 101B, 8575 Government Street, Burnaby, BC, V3N 4V1, Canada. The registered and records office address is Suite 2900 – 550 Burrard Street, Vancouver, BC V6C 0A3, Canada. The Company is engaged in developing novel, scalable and low-cost processing technology for the production of high performance non-structured materials. The financial statements of the Company are presented in Canadian dollars unless otherwise indicated.

At the date of the financial statements, the Company has not yet realized profitable operations and it has relied on non-operational sources of financing to fund operations. The ability of the Company to achieve its objectives, meet its ongoing obligations and recover its investments in pending patents and assets will depend on management’s ability to successfully execute its business plan, achieve profitable operations and obtain additional financing, if or when required. There is no assurance that these initiatives will be successful.

These financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred losses since inception and the ability of the Company to continue as a going-concern depends upon its ability to develop profitable operations and to continue to raise adequate financing. Management is actively targeting sources of additional financing through alliances with financial, or other business and financial transactions which would assure continuation of the Company’s operations. In order for the Company to meet its liabilities as they come due and to continue its operations, the Company is solely dependent upon its ability to generate such financing. Management estimates the Company has sufficient working capital to maintain the operations for the upcoming year.

There can be no assurance that the Company will be able to continue to raise funds, in which case the Company may be unable to meet its obligations. Should the Company be unable to realize its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded in these financial statements.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

## **2. SIGNIFICANT ACCOUNTING POLICIES**

### **Statement of compliance and basis of presentation**

These financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”).

The financial statements have been prepared on a historical cost basis, except for financial instruments measured at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

### **Foreign currency translation**

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated at the period end exchange rate while non-monetary

assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in profit or loss.

### **Cash and cash equivalents**

Cash and cash equivalents are comprised of cash on hand and demand deposits. Cash equivalents are short term, highly-liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in values.

### **Financial instruments**

IFRS 9 – Financial Instruments

#### Classification and measurement

IFRS 9 replaced IAS 39 - Financial Instruments: Recognition and Measurement. IFRS 9 is effective for periods beginning on or after January 1, 2018. Under IFRS 9, financial assets are classified and measured either at amortized cost, fair value through other comprehensive income (“FVOCI”) or fair value through profit and loss (“FVTPL”) based on the business model in which they are held and the characteristics of their contractual cash flows.

All financial assets not classified at amortized cost or FVOCI are measured at FVTPL. On initial recognition, the Company can irrevocably designate a financial asset at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated at FVTPL:

- i. It is held within a business model whose objective is to hold the financial asset to collect the contractual cash flows associated with the financial asset instead of selling the financial asset for a profit or loss;
- ii. Its contractual terms give rise to cash flows that are solely payments of principal and interest.

All financial instruments are initially recognized at fair value on the statement of financial position. Subsequent measurement of financial instruments is based on their classification. Financial assets and liabilities classified at FVTPL and FVOCI are measured at fair value with changes in those fair values recognized in profit or loss and other comprehensive income, respectively. Financial assets and financial liabilities classified at amortized cost are measured at using the effective interest method.

#### Impairment of financial assets

For financial assets measured at amortized cost, recognition of credit losses is no longer dependent on the identification of a credit loss event. Instead, the impairment assessment considers a broader range of information in assessing credit risk and measuring expected credit losses (ECL), including past events, current conditions, and reasonable and supportable forecasts that affect collectability of the future cash flows of the financial statements

The key elements used in the calculation of ECL are as follows:

- *Probability of default* – It is an estimate of likelihood of default over a given time horizon.
- *Loss given default* – It is an estimate of loss arising in case where a default occurs at a given time. It is based on the difference between the contractual cash flows of a financial instrument due from

a counterparty and those that the Company would expect to receive, including the realization of any collateral.

- *Exposure at default* – It represents the gross carrying amount of the financial instruments subject to the impairment calculation.

Measurement of the ECL is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

The following table summarizes the classification and measurement for each financial instrument of the Company:

|  |                |
|--|----------------|
| Cash and cash equivalents                | Amortized cost |
| Receivables                              | Amortized cost |
| Accounts payable and accrued liabilities | Amortized cost |
| Accounts payable to related parties      | Amortized cost |

### **Non-financial assets**

#### Equipment

Equipment is recorded at historical cost less accumulated depreciation and impairment charges. Equipment is depreciated using the declining balance method. The significant classes of equipment and the annual rates are as follows:

|                                    |     |
|------------------------------------|-----|
| Research and development equipment | 20% |
| Office equipment                   | 20% |
| Computer hardware                  | 30% |
| Computer software                  | 50% |

#### Pilot Plant

Pilot plant is recorded at historical cost less accumulated depreciation and impairment charges. Pilot plant is depreciated using the straight-line method over the estimated useful lives of the individual assets. The significant classes of pilot plant and the rates are as follows:

|                        |         |
|------------------------|---------|
| Forklift and equipment | 2 years |
| Pilot plant equipment  | 2 years |

#### Intangible assets

Intangible assets with finite lives are measured at cost less accumulated amortization and impairment charges. These intangible assets are amortized on a straight-line basis over their estimated useful lives. Useful lives, residual values and amortization methods for intangible assets with finite useful lives are reviewed at least annually.

Indefinite life intangible assets are measured at cost less any impairment charges. These intangible assets are tested for impairment on an annual basis or more frequently if there are indicators that intangible assets may be impaired.

### Impairment

The Company's non-financial assets are reviewed for an indication of impairment at the end of each reporting period. If an indication of impairment exists, the asset's recoverable amount is estimated. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

An impairment loss is reversed if there is an indication that there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized. A reversal of an impairment loss is recognized immediately in profit or loss.

### **Share-based payments**

The Company grants stock options to buy common shares of the Company to directors, officers, employees and consultants. An individual is classified as an employee when the individual is an employee for legal or tax purposes, or provides services similar to those performed by an employee.

The fair value of stock options is measured on the date of grant, using the Black-Scholes option pricing model, and is recognized over the vesting period. Consideration paid for the shares on the exercise of stock options is credited to share capital. When vested options are forfeited or are not exercised at the expiry date, the amount previously recognized in share-based payments is transferred to accumulated losses (deficit).

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at the fair value of the share-based payments. Otherwise, share-based payments are measured at the fair value of goods or services received.

### **Warrants issued in equity financing transactions**

The Company engages in equity financing transactions to obtain the funds necessary to continue operations and develop patent pending technologies. These equity financing transactions may involve issuance of common shares or units. A unit comprises a certain number of common shares and a certain number of share purchase warrants. Depending on the terms and conditions of each equity financing agreement, the warrants are exercisable into additional common shares prior to expiry at a price stipulated by the agreement. Warrants that are part of units are assigned value based on the residual value method and included in share capital with the common shares that were concurrently issued. Warrants that are issued as payment for agency fees or other transactions costs are accounted for as share-based payments.

### **Income taxes**

Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity. Current tax expense is the expected tax payable on

the taxable income for the year, using tax rates enacted or substantively enacted at year end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences do not result in deferred tax assets or liabilities: goodwill not deductible for tax purposes; the initial recognition of assets or liabilities that affect neither accounting or taxable loss; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the date of the statement of financial position.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

### **Loss per share**

The dilutive effect on earnings (loss) per share is recognized on the use of the proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds would be used to purchase common shares at the average market price during the period. For the periods presented, this calculation proved to be anti-dilutive.

Basic earnings (loss) per common share is calculated using the weighted-average number of shares outstanding during the period.

### **Government assistance**

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognized as a deduction against the related expense over the period necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Where the grant relates to an asset, it reduces the carrying amount of the asset. Government assistance received relating to expenses of future periods is deferred and deducted against the related expenditures as incurred.

### **Research and development**

Research costs are expensed as incurred to the statement of comprehensive loss. Development costs are expensed as incurred unless capitalization criteria under IFRS are met for deferral and amortization. No development costs have been capitalized to date.

Research and development expenses are net of research and development government grants received.

### **Significant accounting estimates and judgments**

The preparation of the financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statement and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The financial statements include estimates which, by their nature,

are uncertain. The impact of such estimates is pervasive throughout the financial statement, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

*Critical accounting estimates*

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

1. the inputs used in the accounting for share-based payments expense in the statements of loss and comprehensive loss; and
2. the inputs used in the accounting for finders' warrants in share capital.

*Critical accounting judgments*

The following are key assumptions concerning the future and other key sources of estimation uncertainty that have significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

1. going concern of operations;
2. determining whether or not development costs meet the criteria to be capitalized; and
3. determining the provisions for income taxes and the recognition of deferred income taxes.

**3. RECENT ACCOUNTING STANDARDS**

IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation, and disclosure of leases including guidance for both parties to a contract, the lessee and the lessor. The new standard eliminates the classification of leases as either operating or finance leases as is required by IAS 17 and instead introduces a single lessee accounting model. The standard is effective for annual periods beginning on or after January 1, 2019.

The Company has applied IFRS 16 on its effective date of January 1, 2019 using the modified retrospective approach.

During the period ended June 30, 2019, \$25,532 (2018 - \$Nil) of depreciation has been recorded in research and development expenses.

**7. INTANGIBLE ASSETS**

Intangible assets include patents associated with the Company's technology. The patents will expire sixteen (16) to eighteen (18) years from the application filing date. The capitalized amount represents the application costs. The related amortization for the year is immaterial.

**8. GOVERNMENT ASSISTANCE**

Effective June 1, 2016, the Company was granted by the National Research Council of Canada's Industrial Research Assistance Program ("NRC-IRAP") a non-repayable contribution of up to \$222,857. NRC-IRAP requires that the proceeds from the grant be applied towards the development of High Voltage Cobalt Free Cathode Materials. Under the terms of the agreement, NRC-IRAP has agreed to reimburse the Company for 80% of salaries paid to Company employees and 50% of supported contractor fees involved in this pilot facility. A total of \$Nil (2018 - \$15,408) was claimed by the Company during the period ended June 30, 2019.

Effective June 1, 2016, the Company executed a contribution agreement with Sustainable Development Technology Canada ("SDTC") for up to \$2.08 million technology commercialization grant. To date, the Company has received three instalments totaling \$1,873,167 (2018 – one instalment of \$760,145; 2017 - two instalments totaling \$1,113,022) for all three phases of a lithium battery materials pilot plant project. Funds were dispersed at the beginning of each phase and were subject to the Company meeting milestones and having matching funds in place. To date, the holdback retained by SDTC amounted to \$208,130, which will be released when the project is completed.

Effective June 1, 2016, the Company was awarded up to \$1.9 million (claimed - \$1,733,476) in funding from Automotive Supplier's Innovation Program (ASIP) – a program of Innovation, Science and Economic Development Canada (ISED). The program requires that the proceeds be applied to the preparation, design, construction, optimization, and operation of a pilot plant. A total of \$168,691 (2018 - \$Nil) was claimed and received by the Company during the period ended June 30, 2019.

**NANO ONE MATERIALS CORP.**  
**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS** (unaudited)  
(Expressed in Canadian Dollars)  
**FOR THE PERIOD ENDED JUNE 30, 2019**  
**Page 9**

Effective August 1, 2018, the Company was granted by the NRC-IRAP a non-repayable contribution of up to \$349,000 (claimed - \$90,727). NRC-IRAP required that the proceeds for the grant be applied towards the development of coatings for high durability lithium ion battery cathodes. Under the terms of the agreement, NRC-IRAP agreed to reimburse the Company for 80% of the salaries paid to Company employees involved in this project. The Company received a total of \$32,836 during the period ended June 30, 2019.

During the period ended June 30, 2019, the Company received additional government grants for training and employment totaling \$15,000 (2018 - \$34,040).

Total government assistance recognized for the period ended June 30, 2019 was \$216,528 (2018 - \$49,448). The amount is offset against research and development expense on the statement of loss and comprehensive loss.

**9. LEASE LIABILITIES**

|  | <b>June 30, 2019</b> |
|--|----------------------|
|  | \$                   |
| Lease liabilities at January 1, 2019       | 320,320              |
| Additions                                  | -                    |
| Interest on leases                         | 13,801               |
| Lease payments                             | (46,865)             |
| Total lease liabilities                    | 287,256              |
| Less: Current portion of lease liabilities | 99,056               |
| Non-current portion of lease liabilities   | 188,200              |

During the year ended December 31, 2016, the Company entered into lease agreements for its corporate head office and pilot plant facility (Note 5). On February 15, 2019, the Company entered into agreements to renew the leases for three years from October 1, 2019 to September 30, 2022.

In addition to the lease payments made above, the Company incurred \$6,000 in lease expense for the period ended June 30, 2019 relating to short-term lease. There were no low-value leases incurred for the period ended June 30, 2019.

Future minimum lease payments relating to lease liabilities are as follows:

|                   | <b>June 30, 2019</b> |
|-------------------|----------------------|
|                   | \$                   |
| Remaining of 2019 | 97,281               |
| 2020              | 102,607              |
| 2021              | 104,382              |
| 2022              | 52,191               |
|                   | 356,461              |

As at June 30, 2019, the incremental borrowing rates used to measure the lease liabilities was 9%.

**10. RELATED PARTY TRANSACTIONS**

Key management personnel are the persons responsible for the planning, directing and controlling the activities of the Company and includes both executive and non-executive directors, and entities controlled by such persons. The Company considers all directors and officers of the Company to be key management personnel.

The following transactions were carried out with related parties:

**(a) Purchases of services**

|   | <b>June 30,<br/>2019</b> | <b>June 30,<br/>2018</b> |
|---|--------------------------|--------------------------|
|   | \$                       | \$                       |
| An entity where an executive director is an officer, for miscellaneous operating expenses | -                        | 4,321                    |
| An entity where a director is an officer, for legal fees                                  | 63,359                   | 51,198                   |
|   | <b>63,359</b>            | <b>55,519</b>            |

**(b) Key management compensation**

Key management includes directors (executive and non-executive) and officers of the Company. The compensation paid or payable to key management for employee services is shown below:

|  | <b>June 30,<br/>2019</b> | <b>June 30,<br/>2018</b> |
|--|--------------------------|--------------------------|
|  | \$                       | \$                       |
| Consulting fee to an executive director      | 30,000                   | 30,000                   |
| Salary and benefits to a former officer      | -                        | 48,220                   |
| Salary and benefits to an executive director | 40,200                   | 40,167                   |
| Salary and benefits to an executive director | 67,042                   | 66,295                   |
|  | <b>137,242</b>           | <b>184,682</b>           |

**(c) Accounts payable to related parties**

As at June 30, 2019, accounts payable to related parties consisted of \$11,194 (2018 - \$9,192) owing to a director and companies controlled by a director and officer of the Company.

**11. SHARE CAPITAL AND EQUITY RESERVES**

**(a) Common shares**

The authorized share capital of the Company consists of unlimited common shares without par value.

Changes in issued share capital and equity reserves for the period ended June 30, 2019 were as follows:

1. The Company issued 50,000 common shares pursuant to the exercise of stock options at \$0.35 for gross proceeds of \$17,500. Accordingly, \$16,720 was transferred from equity reserves to share capital.

2. The Company issued 25,000 common shares pursuant to the exercise of stock options at \$0.70 for gross proceeds of \$17,500. Accordingly, \$11,037 was transferred from equity reserves to share capital.
3. The Company issued 132,500 common shares pursuant to the exercise of warrants at \$1.25 for gross proceeds of \$165,625.
4. The Company issued 16,065 common shares pursuant to the exercise of finders' warrants at \$1.25 for gross proceeds of \$20,082. Accordingly, \$4,369 was transferred from equity reserves to share capital.
5. \$49,584 was transferred from equity reserves to share capital due to 51,500 shares of expired stock option.

Changes in issued share capital and equity reserves for the period ended June 30, 2018, were as follows:

1. The Company issued 400,000 common shares under the exercise of stock options at \$0.35 for gross proceeds of \$140,000. Accordingly, \$133,758 was transferred from equity reserves to share capital.
2. The Company issued 307,500 common shares under the exercise of warrants at \$1.25 for gross proceeds of \$384,375.
3. The Company issued 48,825 common shares under the exercise of finders' warrants at \$1.25 for gross proceeds of \$61,031. Accordingly, \$13,279 was transferred from equity reserves to share capital.
4. The Company issued 62,500 common shares pursuant to the exercise of warrants at \$1.25 for gross proceeds of \$78,125.

**(b) Stock option plan**

The Company has a stock option plan under which it is authorized to grant options to directors, officers, consultants and employees to acquire up to 10% of the issued and outstanding shares at the time of each grant. The exercise price of each option shall not be less than the discounted market price of the Company's stock as calculated on the date of grant. The options can be granted for a maximum term of ten years. All options are to be settled by physical delivery of shares.

| <b>5,971,000</b>     |                   |                    |

**(c) Share-based payments**

The fair value of options granted during the period was \$nil (2018 – \$166,459) or \$nil (2018 - \$0.67) per option. The share-based payments expense recognized for the period was \$332,340 (2018 - \$177,155). Fair value at grant date of the stock option plan was measured based on the Black-Scholes option-pricing model. Expected volatility is estimated by considering historic average share price volatility.

The assumptions used for the Black-Scholes option-pricing model of stock options granted during the period ended June 30, 2019 are as follows:

|                          | January 24, 2019 | March 21, 2019 |
|--------------------------|------------------|----------------|
| Risk-free interest rate  | 1.86%            | 1.56%          |
| Expected life of options | 2 years          | 5 years        |
| Annualized volatility    | 74.23%           | 83.35%         |
| Dividend rate            | 0.00%            | 0.00%          |

| Issued date          | Balance,<br>December<br>31, 2018 | Issued | Exercised | Expired | Exercise<br>price \$ | Balance,<br>June 30,<br>2019 | Expiry date          |
|----------------------|----------------------------------|--------|-----------|---------|----------------------|------------------------------|----------------------|
| September 8,<br>2017 | 1,879,555                        | -      | 148,565   | -       | 1.25                 | 1,730,990                    | September 8,<br>2019 |
|                      | 1,879,555                        | -      | 148,565   | -       |                      | 1,730,990                    |                      |

**12. LOSS PER SHARE**

The calculation of basic and diluted loss per share for the period ended June 30, 2019 was based on the loss attributable to common shareholders of \$2,518,668 (June 30, 2018 - \$1,722,614) and a weighted average number of common shares outstanding of 66,324,486 (June 30, 2018 – 65,169,572).

Diluted loss per share did not include the effect of 5,971,000 stock options (June 30, 2018 – 3,730,000) and 1,730,990 warrants (June 30, 2018 – 1,879,555) as they are anti-dilutive.

**13. MANAGEMENT OF CAPITAL**

The Company's objective when managing capital is to safeguard its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain optimal capital structure to reduce to the cost of capital. The Company's capital is composed of shareholders' equity in the statement of financial position.

The Company is not subject to externally imposed capital requirements. In managing capital structure, the Company manages its capital through regular reports to the Board of Directors, as well as management review of monthly or quarterly financial information. The Company issues new equity

financing as needed and available. There were no changes to the Company's management of capital during the period.

#### **14. SUPPLEMENTAL CASH FLOW INFORMATION**

Significant non-cash transactions for the period ended June 30, 2019 included:

- a) The Company allocated \$4,369 for finders' warrants exercised during the period to share capital from equity reserves.
- b) The Company allocated \$277,757 for stock options exercised during the period to share capital from equity reserves.
- c) The Company reversed \$49,584 for stock options expired during the period to share capital from equity reserves.
- d) Interest paid on lease liabilities amounted to \$13,801 (2018 - \$Nil)
- e) The Company recognised \$332,340 share-based compensation expense.

Significant non-cash transactions for the period ended June 30, 2018 included:

- a) The Company allocated \$133,758 for stock option exercised during the period to share capital from equity reserves.
- b) The Company allocated \$13,279 for warrants exercised during the period to share capital from equity reserves.
- c) The Company recognised \$177,155 share-based compensation expense.

#### **15. FINANCIAL INSTRUMENTS**

The Company is exposed to various financial instrument risks and assesses the impact and likelihood of this exposure. These risks include liquidity, credit, currency, interest rate, and price risks. Where material, these risks are reviewed and monitored by the Board of Directors.

##### **Liquidity Risk**

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities. The Company has historically relied upon equity financings to satisfy its capital requirements and will continue to depend heavily upon equity capital and possible loans to finance its activities. The Company manages liquidity risk through its capital management as outlined in Note 12 above. Accounts payable and accounts payable to related parties are due within one year.

##### **Credit Risk**

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and cash equivalents, and receivables. The Company limits exposure

to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions.

The majority of the Company's cash and cash equivalents is held with major Canadian based financial institutions. The Company considers credit risk with respect to the receivables to be minimal.

### **Interest Rate Risk**

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Current cash is generally not exposed to interest rate risk because of their short-term maturity.

### **Price Risk**

The Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices. The Company closely monitors the individual equity movements to determine the appropriate course of action to be taken by the Company.

Based on management's knowledge and experience of the financial markets, management does not believe that the Company's current financial instruments will be affected by interest rate risk, currency risk and credit risk.

### **Fair Value**

The Company classifies its fair value measurements in accordance with the three-level fair value hierarchy as follows:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The carrying value of cash and cash equivalents, receivables, accounts payable and accounts payable to related parties approximate their fair values due to the short-term nature of these instruments.

## **16. SEGMENTED INFORMATION**

The Company operates in one business segment, being a developer of patent pending technology for the production of nanostructured materials.

## **17. COMMITMENT**

On April 15, 2011, the Company entered into an Assignment and Royalty Agreement (the "Agreement") with Lithium Ion Power LLC ("LIP") and Teresita F. Kullberg ("Kullberg") that will survive until the last patent issued under any of the technologies expires. In accordance with the Agreement, Kullberg and LIP assigned to the Company all of its rights, title and interest in and to the technologies and all such rights in and to any and all improvements. The Company must pay a royalty of 3% on net revenues from all consideration collected or received from the marketing, manufacturing, sale or distribution of or licensing the right to do any of the same of the goods manufactured with the use of all or some of the technologies. As at June 30, 2019, the Company had not yet generated any revenue, therefore, no royalties have been paid or accrued.

**18. EVENTS AFTER REPORTING DATE**

Subsequent to June 30, 2019:

The Company issued 676,500 common shares pursuant to exercise of warrants at \$1.25 for gross proceeds of \$845,625, which enables 676,500 incentive warrants valid under the “Early Warrant Exercise Incentive Program” announced by the Company on July 31, 2019.
